Implementation Convention

U.S. DEPARTMENT OF COMMERCE Technology Administration National Institute of Standards and Technology he National Institute of Standards and Technology was established in 1988 by Congress to "assist industry in the development of technology . . . needed to improve product quality, to modernize manufacturing processes, to ensure product reliability . . . and to facilitate rapid commercialization . . . of products based on new scientific discoveries."

NIST, originally founded as the National Bureau of Standards in 1901, works to strengthen U.S. industry's competitiveness; advance science and engineering; and improve public health, safety, and the environment. One of the agency's basic functions is to develop, maintain, and retain custody of the national standards of measurement, and provide the means and methods for comparing standards used in science, engineering, manufacturing, commerce, industry, and education with the standards adopted or recognized by the Federal Government.

As an agency of the U.S. Commerce Department's Technology Administration, NIST conducts basic and applied research in the physical sciences and engineering, and develops measurement techniques, test methods, standards, and related services. The Institute does generic and precompetitive work on new and advanced technologies. NIST's research facilities are located at Gaithersburg, MD 20899, and at Boulder, CO 80303. Major technical operating units and their principal activities are listed below. For more information contact the Publications and Program Inquiries Desk, 301-975-3058.

Reports on Information Technology

The National Institute of Standards and Technology (NIST)'s Information Technology Laboratory (ITL) develops standards and guidelines, provides technical assistance, and conducts research for computers and resources. As part of the overall federal effort to establish a single face to industry for conducting electronic commerce, ITL has been designated as the organization responsible for coordinating the development of Federal Implementation Conventions (ICs) for Electronic Data Interchange (EDI). ICs are defined by functional-area experts who create and select options from standard EDI Transaction Sets to yield the implementations to be used for practical EDI. These ICs are made available to federal agencies and industry by electronic means and this Special Publication Series.

836 Procurement Notices

Functional Group ID=RQ

Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Procurement Notices Transaction Set (836) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used by the buyer to notify the seller or other interested parties of the award or pending award of a contract which may contain some indefinite features, such as delivery schedule, location, and/or quantities. This transaction set can also be used for purchasing actions such as the notification of intent to award or actual award of a small business set-aside purchase, notification of being outside of the competitive range, notice of receipt of protest, notice of receipt of a late bid, notice of bid rejection, notice of the disposition of an unsolicited proposal, public notice of the abstract of bids, and the notification of the award of a requirements type contract.

Notes:

- 1. This transaction set can be used as an award announcement. This notification will be publicly available to all interested parties and will provide the name of the party awarded the instrument and the price of the line items awarded.
- 2. This transaction set can be used to provide publicly available data (BCO11 is code 65) on a single award even if the award was the result of more than one solicitation.
- 3. This transaction set can be also used by a buying activity as a preaward notification to bidders that their proposals are no longer being considered for award; as a postaward notification to unsuccessful bidders; as a notice of intent to award a Small Business Set-Aside; as a notification to late bidders; as a notification of a receipt of a protest; and as a notification of disposition of an unsolicited proposal.

Segment: MSG Message Text

Position: 024

Loop:

Level:

Purpose:

Usage: Optional

Max Use: >1

To provide a free form format that would allow the transmission of text information.

Syntax Notes: Semantic Notes:

Comments:

1 MSG02 is not related to the specific characteristics of a printer, but identifies top of page, advance a line, etc.

Notes:

1. When BCO12 is code 7, use this segment to identify the additional information required. When BCO12 is code 9, use this segment to identify the reasons the unsolicited proposal is not being processed.

2. Use also when LQ02 in either the 1/LQ/034 or 1/LQ/186 segment is any code that requires a more detailed explanation.

	Ref.	Data	·		
	Des.	Element	<u>Name</u>	Att	ributes
Must Use	MSG01	933	Free-Form Message Text Free-form message text	M	AN 1/264
Not Used	MSG02	934	Printer Carriage Control Code A field to be used for the control of the line feed of the received.	O civing	ID 2/2 printer

Segment: N1 Name

Position: 025

Loop: N1 Optional

Level:

Usage: Optional

Max Use:

To identify a party by type of organization, name, and code

Purpose: Syntax Notes:

1 At least one of N102 or N103 is required.

2 If either N103 or N104 is present, then the other is required.

Semantic Notes: Comments:

1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2 N105 and N106 further define the type of entity in N101.

Notes:

- 1. Whenever possible, identification and address information should be provided using N101, N103, and N104. Use N102 and segments N2 through N4, as applicable, when address information cannot be provided using one of the codes listed in N103.
- 2. When BCO11 is code 63, use of this segment is REQUIRED to identify the party receiving an award but only if one party was awarded all of the line items in a solicitation. If line items in a solicitation were awarded to various parties, use the 1/N1/130 segment to identify the parties.
- 3. When BCO11 is code 64, and the total award is to be made to one small business entity, use of this segment is REQUIRED to identify that entity. If multiple small business entities are to receive awards, use the 1/N1/130 segment to identify those entities to be awarded specific line items.
- 4. When BCO11 is code 65, this segment is REQUIRED to identify the party receiving an award.

			Data Ele	ement Summary

Code indicating a code from a specific industry code list

1. Use to cite a code from the code list identified by the qualifier in LQ01.

Use to indicate that a code list is identified in LM02.

2. When LQ01 is code ZZ, use to cite a code from the code list identified in LM02.

Segment: PO1 Baseline Item Data

Position: 035

Loop: PO1 Optional

Level:

Usage:

Optional

Max Use:

1

Purpose: Syntax Notes:

To specify basic and most frequently used line item data

- 1 If PO103 is present, then PO102 is required.
- 2 If PO105 is present, then PO104 is required.
- 3 If either PO106 or PO107 is present, then the other is required.
- 4 If either PO108 or PO109 is present, then the other is required.
- 5 If either PO110 or PO111 is present, then the other is required.
- 6 If either PO112 or PO113 is present, then the other is required.
- 7 If either PO114 or PO115 is present, then the other is required.
- 8 If either PO116 or PO117 is present, then the other is required.
- 9 If either PO118 or PO119 is present, then the other is required.
- 10 If either PO120 or PO121 is present, then the other is required.
- 11 If either PO122 or PO123 is present, then the other is required.
- 12 If either PO124 or PO125 is present, then the other is required.

Semantic Notes: Comments:

- 1 See the Data Dictionary for a complete list of ID's.
- **2** PO101 is the line item identification.
- 3 PO106 through PO125 provide for ten (10) different product/service ID's per each item. For example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Notes:

- 1. Use this 1/PO1/035 loop to provide award data for each line item in the solicitation when BCO11 is code 63 or 65.
- 2. When BCO11 is code 62, use this loop only to identify those line items which the offeror is no longer being considered for award.
- 3. When BCO11 is code 64, use this loop only to identify those line items in a Small Business Set-Aside that are being awarded to different small business entities.
- 4. When BCO11 is code 69, use this loop to identify those line items that are being rejected on an individual bid.
- 5. This loop is not used when BCO11 is code 66, 67, or 70.

CTP Pricing Information **Segment:**

Position: 050

> Loop: PO₁ Optional

Level:

Usage: Optional Max Use: >1

Purpose:

To specify pricing information

Syntax Notes:

If either CTP04 or CTP05 is present, then the other is required.

If CTP06 is present, then CTP07 is required. 2 If CTP09 is present, then CTP02 is required. 3

4 If CTP10 is present, then CTP02 is required.

Semantic Notes:

CTP07 is a multiplier factor to arrive at a final discounted price. A multiplier of .90 would be the factor if a 10% discount is given.

CTP08 is the rebate amount.

Comments:

See Figures Appendix for an example detailing the use of CTP03 and CTP04. See Figures Appendix for an example detailing the use of CTP03, CTP04 and CTP07.

Notes:

1. Use this segment to provide additional price information related to the line item awarded, e.g., step-ladder prices, delivery zone prices, packaging prices, etc.

2. This segment is used only when BCO11 is code 63 or 65.

Data Element Summary

	Ref.	Data			
	Des.	Element	Name	<u>Att</u>	ributes
Not Used	CTP01	687	Class of Trade Code	0	ID 2/2
			Code indicating class of trade		
	CTP02	236	Price Identifier Code	X	ID 3/3

Code identifying pricing specification

Use to identify various prices applicable to the line item.

ICL

Unit Price Through Quantity

- 1. Use to indicate the end of a quantity range applicable to step ladder pricing.
- 2. Use in conjunction with codes PBQ and MAX for step ladder pricing. Step ladder pricing is defined as the price specified for the quantity range containing the quantity purchased, applying to all the items purchased. Use of codes ICL, MAX and PBQ is in contrast to use of code PAQ which identifies quantities at which different prices are applied.

Maximum Order Quantity Price

- 1. Use to indicate the end of a quantity range applicable to step ladder pricing.
- 2. Use in conjunction with codes ICL and PBQ for step ladder pricing. Step ladder pricing is defined as the price specified for the quantity range containing the quantity purchased, applying to all the items purchased. Use of codes ICL, MAX and PBQ is in contrast to use of code PAQ which identifies quantities at which different prices are applied.

PAP Protection Level Price

> Use to indicate the price for the packaging protection level (preservation) cited in CTP10. This amount is additive to the unit price cited in PO104 or to the zone

MAX

Segment: N1 Name

Position: 130

Loop: N1 Optional

Level: Usage:

: Optional

Max Use:

1

Purpose: Syntax Notes:

To identify a party by type of organization, name, and code

1 At least one of N102 or N103 is required.

2 If either N103 or N104 is present, then the other is required.

Semantic Notes:

Comments:

1 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.

2 N105 and N106 further define the type of entity in N101.

Notes:

1. Use this segment only when BCO11 is code 63 and the line items in a solicitation were awarded to different parties or code 64 and the apparent small business successful offeror is different for each line item.

2. Use of this segment is REQUIRED for the conditions stated in note 1.

3. Whenever possible, identification and address information should be provided using N101, N103, and N104. Use N102 and segments N2 through N4, as applicable, when address information cannot be provided using one of the codes listed in N103.

Segment: LM Code Source Information

Position: 185

Loop: LM Optional

Level:

Usage: Optional

Max Use: Purpose:

To transmit standard code list identification information

Syntax Notes: Semantic Notes:

Comments: 1 LM02 identifies the applicable industry code list source information.

Notes:

1. Use this 1/LM/185 loop to provide coded information to identify the reason the line item in the proposal is no longer being considered for award; why the proposal for the line item was unacceptable; why the line item bid was rejected, or the solicitation method applicable to the line item.

2. This segment is used only when BCO11 is code 62, 63, 65, or 69.

			Data Brement Sammar y		
	Ref.	Data			
	Des.	Element	<u>Name</u>	Att	<u>ributes</u>

			Code identifying the agency assigning the code values		
			DF Department of Defense (DoD)		
	LM02	822	Source Subqualifier	O	AN 1/15
			A reference that indicates the table or text maintained b	y the Sou	rce Qualifier
			When LQ01 is code ZZ, identify the code list that cont LQ02.	ains the c	code cited in

Industry Code Segment:

Position: 186

> Loop: LM Optional

Level:

Usage: Mandatory

Max Use:

>1

Purpose: **Syntax Notes:** Code to transmit standard industry codes If LQ01 is present, then LQ02 is required.

Semantic Notes:

Comments:

Notes:

This segment is used only when BCO11 is code 62, 63, 65, or 69, and the information varies by line item. When this information applies to all of the line items, use the 1/LQ/034 segment.

Data Element Summary

Ref. Data Des. **Element** Name **Attributes** LQ01 1270 Code List Qualifier Code ID 1/3 Code identifying a specific industry code list NL No Longer Considered for Award Reason When BCO11 is code 62, use to indicate the reason a line item is no longer being considered for award. RF Failure to Award Reason When BCO11 is code 63, use to indicate the reason a proposal for a line item was unacceptable.

RR Bid Rejection Reason

When BCO11 is code 69, use to indicate the reason for

the rejection of a line item bid.

Solicitation Method SM

> When BCO11 is code 65, use to indicate the method by which offers were solicited for the line item, e.g., direct

solicitation, sole source, bulletin board, etc.

ZZMutually Defined

Use to indicate that a code list is identified in LM02.

LQ02 1271 **Industry Code** X AN 1/20

Code indicating a code from a specific industry code list

- 1. Use to cite a code from the code list identified by the qualifier in LQ01.
- 2. When LQ01 is code ZZ, use to cite a code from the code list identified in LM02.

Segment: SE Transaction Set Trailer

Position: 190

Loop:

Level: Usage: Mandatory

Max Use: 1

Purpose: To indicate the end of the transaction set and provide the count of the transmitted

segments (including the beginning (ST) and ending (SE) segments).

Syntax Notes:

Semantic Notes:

Comments: 1 SE is the last segment of each transaction set.

	Ref.	Data

	functional group assigned by the originator for a transaction set				
			Cite the same number that is contained in ST02.	55.	

NIST Technical Publications

Periodical

Journal of Research of the National Institute of Standards and Technology—Reports NIST research and development in those disciplines of the physical and engineering sciences in which the Institute is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Institute's technical and scientific programs. Issued six times a year.

Nonperiodicals

Monographs—Major contributions to the technical literature on various subjects related to the Institute's scientific and technical activities.

Handbooks—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications—Include proceedings of conferences sponsored by NIST, NIST annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NIST under the authority of the National Standard Data Act (Public Law 90-396). NOTE: The Journal of Physical and Chemical Reference Data (JPCRD) is published bimonthly for NIST by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements are available from ACS, 1155 Sixteenth St., NW, Washington, DC 20056.

Building Science Series—Disseminates technical information developed at the Institute on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NIST under the sponsorship of other government agencies.

Voluntary Product Standards—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NIST administers this program in support of the efforts of private-sector standardizing organizations.

Order the following NIST publications—FIPS and NISTIRs—from the National Technical Information Service, Springfield, VA 22161.

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. The Register serves as the official source of information in the Federal Government regarding standards issued by NIST pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NIST Interagency Reports (NISTIR)—A special series of interim or final reports on work performed by NIST for outside sponsors (both government and nongovernment). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.
